Portfolio: <https://vishonsingh.com/>

I am a passionate web developer who utilizes HTML5, CSS3, Sass, JavaScript, TypeScript, React, Redux, NodeJS, ExpressJS, and MongoDB. I've been studying development since the age of 14 and now looking to use my skills to help bring benefits to a company.

Projects

Lucid Budget

Technologies: React, NodeJS, ExpressJS, MongoDB, Mongoose and ChartJS

Full Stack budget app using React Hooks, JWT for user authentication, Node for backend, along with MongoDB for the database. This app fully utilizes the MERN stack.

Movie App

Technologies: React, Redux, NodeJS, ExpressJS, MongoDB and Mongoose

This clone utilizes TMDb API with JWT user authentication. This uses the MERN stack and is hosted on Heroku, this utilizes Redux to help handle the user data from the JWT token.

Don Pollo's Restaurant Website

Technologies: HTML, CSS, Sass, React, TypeScript, and Material UI

Don Pollo is my local restaurant and I decided to make a better and updated website for them. This website showcases my TypeScript, Sass, and Material UI skills as well as my design and freelance skills.

Random Famous Quote Machine

Technologies: HTML, CSS, JavaScript and React

This App gathers famous quotes from an API and allows users to shuffle through them. This app was kept simple but convenient for those looking for motivational or inspirational quotes.
