## Experience With

---

HTML5	CSS3	JavaScript
D3.js	React	NodeJS
MongoDB	Mongoose	ExpressJS

## Projects

---

### Budget App

This is my current main project. What this app offers over others is data-privacy, customization, flexibility, and simplicity.

-- HTML & CSS --  
-- React & NodeJS/Express --  
-- MongoDB/Mongoose --

### Weather App

Grabs current location and displays weather in Celsius or Fahrenheit. It also has a search option to search other locations for current weather.

-- HTML & CSS --  
-- React --

### Anonymous Message Board

A full stack message board app that allows users to post threads and replies and delete them.

-- HTML & CSS --  
-- NodeJS/Express & MongoDB/Mongoose --

### Movie App

This is a movie app clone that has a full login system and allows users to check out the latest movie information and favorite them.

-- HTML & CSS --  
-- React & NodeJS/Express --  
-- MongoDB/Mongoose --

### Random Quote Machine

Generates random quotes on click and allows the current quote and author to be tweeted.

-- HTML & CSS --  
-- React --

### Tic-Tac-Toe

This may be a game but the code and AI logic is the reason why I put it here, this uses a complex recursive function for the high-level AI.

-- HTML & CSS --  
-- JavaScript --
