I am a passionate web developer who utilizes HTML5, CSS3, JavaScript, TypeScript, React, NodeJS, ExpressJS, and MongoDB. I've been studying development since the age of 14 and looking to pursue my true passion in web development.

Projects

Lucid Budget
Technologies: React, NodeJS, ExpressJS, MongoDB, Mongoose and ChartJS

Full Stack budget app using React Hooks, JWT for user authentication, Node for backend, along with MongoDB for the database. This app fully utilizes the MERN stack.

Movie App
Technologies: React, Redux, NodeJS, ExpressJS, MongoDB and Mongoose

This clone utilizes TMDb API with JWT user authentication. This uses the MERN stack and is hosted on Heroku, this utilizes Redux to help handle the user data from the JWT token.

Weather App
Technologies: HTML, CSS, JavaScript and React

Grabs current location and displays weather in Celsius or Fahrenheit using OpenWeatherMap API and React Hooks. It also has a search option to search other locations for current weather.

United States Educational Map
Technologies: HTML, CSS, JavaScript, D3.js and React

Graphed map made in D3.js which displays the United States Educational Attainment Percentage of adults age 25 and older with a bachelor's degree or higher (2010-2014)
